PORTFOLIO aojeda006.github.io

— Explore my work in detail: featured projects, how I build them and the decisions behind them.

PROFESSIONAL PROFILE

Full-stack developer able to design and build complete, well-structured and maintainable applications, applying SOLID principles and Clean Architecture. Experienced in healthcare data interoperability under the HL7 v2 and FHIR R5 standards, gained at Accenture migrating and mapping clinical data between both standards. Recently certified as an **IBM Mainframe Developer** (COBOL and IBM Z), broadening my profile towards enterprise computing and the maintenance of mission-critical legacy systems. A serious, professional profile, with ambition and full willingness to train in whatever the role requires.

TECHNICAL SKILLS

Healthcare data interoperability (HL7/FHIR): HL7 v2/v2.5 and FHIR R5 standards; FHIR resources and data exchange in XML and JSON; FHIR profile and extension modeling with Forge; Implementation Guides with FSH, SUSHI and Jekyll; messaging and integration with Kafka and HAPI (Java)

Languages: Java, C#, Python, Kotlin, C++, COBOL, JavaScript/TypeScript, SQL/T-SQL

Mainframe / Enterprise computing: COBOL (fundamentals, core, data and file management, testing and debugging); IBM Z and software development life cycle (SDLC) concepts in a mainframe environment; modern COBOL development with VS Code (IBM Z Open Editor)

Frontend: Angular, React Native, Flutter, HTML, CSS, jQuery, AJAX, JSON; Jetpack Compose (native Android)

Backend and APIs: ASP.NET (C#), Spring (Java), NestJS (Node/TypeScript), FastAPI (Python); web services and REST APIs (HTTP), concurrent programming (multiprocessing), persistence with JDBC and JPA

Databases: MySQL, SQL Server, MongoDB, Access; Entity-Relationship modeling, normalization and physical model; stored procedures, functions, triggers, cursors and transactions (T-SQL)

Architecture and quality: SOLID, Clean Architecture, MVC, MVVM; class and flow diagrams; unit testing (JUnit)

Cloud and deployment: Azure, Vercel, Render

Tools and version control: Git, GitHub, SourceTree; IntelliJ, Eclipse, Visual Studio, VS Code, Android Studio; Postman

Systems, networking and security: Single-workstation OS administration (Windows, Ubuntu, Debian, Kali) and networked (Active Directory, LDAP); network services (DNS, DHCP, S/FTP, HTTP/S, NAT, SSH, mail, wireless networks) on Windows Server and Ubuntu Server; active and passive security, vulnerability detection, encryption and data recovery

Other: 2D/3D game development with Unity (introductory); CMS (WordPress, JTL); office and multimedia editing (Microsoft Office, LibreOffice, GIMP, Audacity, Kdenlive)

EXPERIENCE

Contractor – System Integration and Data Interoperability (FCT internship)

29/04/2025 – 30/05/2025 and 03/03/2026 – 21/05/2026

Accenture · Seville, Spain

Skills / duties developed:

- Theoretical and practical training in the HL7 v2 and FHIR R5 healthcare data interoperability standards.
- Creation of FHIR profiles and extensions with the Forge tool.
- Creation of Implementation Guides for migrating data from HL7 v2.5 to FHIR R5, using Jekyll (Ruby), FSH and SUSHI.
- Queries and CRUD operations against FHIR/HL7 servers and Kafka queues using Postman.
- Development of a Java application with HAPI: a consumer of HL7 v2.5 messages from a Kafka queue, mapping them to FHIR R5 resources via DTO and Service classes, and publishing/updating them on the FHIR server through its REST web services (HTTP, XML/JSON).
- Analysis of existing HL7 implementations in hospitals and health organizations, producing detailed reports (Excel, Word) on the design of equivalent resources in FHIR R5, serving as the basis for the Implementation Guides developed.

IT Technician (FCT internship)

21/03/2024 – 17/06/2024

VAIS-Concepts · Berlin, Germany

Skills / duties developed:

- Preparing quotes to purchase equipment, peripherals, components...
- Market research for selling second-hand hardware.
- Installation and configuration of operating systems.
- Web development with HTML, CSS and JavaScript (both building from scratch and adding new features to existing websites).
- Website maintenance both with CMS (WordPress and JTL) and with code (HTML, CSS, JS).
- Creating content for the social media and marketing strategies of the company's business group (image and video editing).

CERTIFICATIONS

IBM Mainframe Developer — Professional Certificate

IBM & LearnQuest (Coursera) · Jul 2026

7-course professional program: Introduction to Enterprise Computing; IBM COBOL Basics, Core, Software Development Practices, Data and File Management, Basic Testing and Debugging, and Software Development Process. Credential 6H1WOWBXU124.

COBOL Programming with VSCode

IBM (Coursera) · Jul 2026

Modern COBOL development on VS Code with IBM Z tooling. Credential M1PVHYX29Y0R.

EDUCATION

Higher National Diploma in Cross-Platform Application Development

16/09/2024 – 22/06/2026

IES Nervión

Intermediate Vocational Diploma in Microcomputer Systems and Networks

16/09/2022 – 20/06/2024

IES Delgado Hernández

LANGUAGES

English — B2 (Cambridge First)

German — B1 written (Goethe-Zertifikat B1)
